MAHSA University - Historical Overview

MAHSA was established in year 2005 in Pusat Bandar Damansara, Damansara Heights, Kuala Lumpur and is the brainchild of Professor Datuk Dr. Hj. Mohamed Haniffa who is Pro-Chancellor and Executive Chairman. Professor Haniffa is a clinical practitioner of Medicine whose vision involved creating a centre of excellence in Medicine, Dentistry, Pharmacy, Nursing and Allied Health Sciences education in this region thereby developing qualified and compassionate healthcare professionals to serve the needs of our great nation. This is in line with the Prime Minister's vision that Malaysia should become a centre for academic excellence.

Within a short span of time, our students outgrew their original premises and a second campus was set up in Jalan University, Kuala Lumpur. The Jalan University Campus or JUC is now designated as the main campus. From a modest start with the Pre – University Cambridge GCE A' Levels and the three year Diploma in Nursing program in 2005, MAHSA is recognized as one of the premier institutions that focuses in the delivery of education in the field of healthcare offering programmes ranging from Certificate programmes to Diploma, Degree, Masters and Doctorate programmes.

In 2009, MAHSA was upgraded from College to University College status and in February 2013 University status. This rapid upgrade in class in a mere eight years is testament to the exemplary dedication of the academic and administrative staff of the University

MAHSA University is an entity that is continually evolving; developing new programmes, creating pathways of further education and delving into research activities so as to offer prospective and current students a rich learning experience and a comprehensive education which will be valuable and rewarding.

MAHSA University has recently expanded their portfolio of programmes and now offers Business, Accounting, as well as Engineering courses.

The expertise within MAHSA is however captured within a multi-faceted number of other Faculties in addition to Engineering, IT and Built Environment that include

- ☐ Faculty of Medicine
- ☐ Faculty of Dentistry
- ☐ Faculty of Pharmacy
- ☐ Faculty of Allied Health
- ☐ Faculty of Nursing
- ☐ Faculty of Business and Accountancy

Other supporting Centres are;

- Centre for Foundation Studies in Engineering, Business and Science
- Centre for Post Graduate Studies
- Centre for American Degree Studies

To enhance the learning of local and international students MAHSA University has also invested in an ENGLISH LANGUAGE CENTRE offering support and assistance in courses ranging from specifically designed learning packages to 6 week, 3 month, 6 month and one year programmes of study, emphasizing not only English Language but the cultural benefits of living and studying in Malaysia, a predominantly Islamic country offering a safe and supportive environment for learning and practical experience through industrial placements with Malaysian business partners

As a University, learning resources in the form of e-learning journal access to more than 6,000 journal titles and an e-learning library, offering a modest 85,000 digital books supports the learning of our students studies who this year come from no fewer than 35 different countries world wide

Accommodation is located on site bed and study rooms with male and female students separated in different accommodation blocks, the University Student Services Department along with its own onsite security team ensure the safety, security and opportunity to study in purpose built Wi-Fi supported study areas next to University recreation areas such as an open air swimming pool facility, adjacent to easily accessible library facilities

Collaborative working arrangements have been established over the years with United Kingdom Universities. More recently arrangements have been re-engineered in the form of Dual award recognition programmes of study to ensure our clients received quality assured educationally recognized certificates from both MAHSA University and a United Kingdom University. These Universities include Northumbria University, Anglia Ruskin University, Brighton University and Teesside University in which diversification from academic activity has taken on board the wishes and expectations of industrial links to establish a broad base of sustainable training and vocational courses which add variety to a contemporary portfolio of activity

Programme

Assessment of Students English abilities

MAHSA University's English Department, which is based in the Multi-disciplinary Studies and Languages Centre Directorate, is annually engaged in teaching over 1000 MAHSA University students, across all disciplines and academic levels, principally in year one of the courses. They therefore encounter a very diverse range of student English all of which needs to be brought to a key level of understanding for their chosen course. In addition to traditional lecturing methods the Department also has a broad range of state of the art audio-visual and online teaching tools to complement their work and support students with weaker English.

In addition to the core teaching and support highlighted above, the English Department has also been involved in new course development, CPD courses and intensive English for our own students as highlighted below. They were also heavily engaged in composing content and methodology for MAHSA University's recent bid for the Malaysian Government Pro-ELTS training for trainers tender which resulted in a blueprint for future similar applications and a nascent LMS based English Learning platform that will benefit our own students.

With the expansion of CPD, Certificate and IELTS course it is hope that the English Department and Languages Centre can start to generate specific income in the near future and become more cost effective entities.

This assessment of students' abilities wills categories the students in three distinctive areas

AREA One – Will class the student as a **beginner** and intensive programmes and support will be designed over a one year period. Further assessments will be conducted with the intention of placing the students in an appropriate MAHSA University academic programme

AREA Two – Will class the student as an **intermediate** achiever and again suitable programmes and support will be designed over a six month period. Further assessments will be conducted with the intention of placing the students in an appropriate MAHSA University academic programme

AREA Three – Will class the student as an Advanced Beginner, with suitable programs being designed over a three month period, prior to the student commencing an appropriate MAHSA University programme.

PACKAGES

OPTION	THIS PACKAGE PROVIDES:
1 WEEK ENGLISH PROGRAMME Package Price USD 600 (Without Student Visa + Accommodation)	• Airport pickup • English Programme • Twin Sharing with AC • Certificate of participation upon completion of the programme
